

Anesthesia Mask

免充气麻醉面罩

Anesthesia mask is mainly used to provide patients with anesthetic gas during general anesthesia. Its function is to transport anesthetic gas to the respiratory tract, enabling the patient to reach an anesthetic state, while also monitoring the patient's breathing and oxygen saturation.

Product Code	Size	Color	Port (mm)

AM02	Infant	Orange	OD: 15
AM03	Pediatric	Pink	ID: 22
AM04	Adult-S	White	ID: 22
AM05	Adult-M	Yellow	ID: 22
AM06	Adult-L	Green	ID: 22

Nebulizer Mask

雾化面罩

Nebulizer mask is made of non-toxic clear PVC. It consists of a mask that fits over the patient's nose and an adjustable elastic strap that fits around the head to keep the mask in place. Also known as an atomizer, a nebulizer works by changing a patient's medication from a liquid to a fine mist.
