ARES

INTRODUCER SETS

Screw lock and push-lock designs for the hub serve for manipulation needs and ensures safe connection of components

Suture ring on hub convenient for securing the sheath in multi-stage procedures

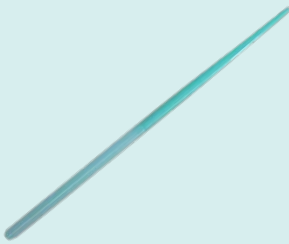

High quality raw materials and expertise in precision offers a smooth sheath and dilator for an simplified insertion

FEATURES & BENEFITS

Mindfully designed **valve** assures reliable **haemostasis** and facilitates catheter manipulation remarkably.

Our expertise in **precision** brings the dilator and sheath transition to an excellent level. The **smooth transition** between components and **dual tapered design** minimize the risk of trauma in surrounding tissue of puncture point.

3-way stopcock at the tip of extension tube allows for **proper flush** of dilator and assures **clear visualization** of bleeding
