Headquarter: Str. EROII SANITARI, NR.25, CAMERA
11, DEMISOL, SECTOR 5, BUCURESTI

Certification

ELO Digital Office GmbH hereby certifies that ELO Digital Office SRL has the right to distribute **ELO** software products, to sell and market them, to implement them as standalone products or as integrated software components and/or with additional services.

The ELO software products, i.e. ELO ECM Suite, ELOoffice, ELOprofessional, and ELOenterprise and ELO modules and apps, include conventional document management functions such as user-defined folder structures, indexing criteria, version histories, document conversion, sticky notes and stamps, modern search technologies based on full text or metadata, OCR recognition and functions for scanning paper documents.

An essential component of ELO software products is the use of custom workflows, including escalation and task management functionalities as well as extensive user and permission controls. Available automation and upgrade options ensure the best possible integration into existing structures or with third party applications based on standard technologies.

Certificare

ELO Digital Office GmbH confirma prin prezenta faptul ca ELO Digital Office SRL detine dreptul de a distribui produsele software **ELO**, de a le vinde si comercializa, de a le implementa ca produse de sine statatoare sau componente software integrate si/sau impreuna cu servicii suplimentare.

Produsele software ELO, de exemplu ELO ECM Suite, ELOoffice, ELOprofessional si ELOenterprise precum si modulele si aplicatiile ELO, includ functii conventionale de management al documentelor cum ar fi: structuri de foldere definite de catre utilizator, criterii de indexare, istoric versiuni, aplicare de notite, stampile, etichete, tehnologii moderne de cautare bazate pe cautarea in text integral sau in metadata, recunoastere optica a caracterelor si functii de scanare a documentelor pe suport de hartie.

O componenta esentiala a produselor software ELO este utilizarea fluxurilor de lucru personalizate, inclusiv functionalitati de escaladare si gestiune a sarcinilor de lucru, precum si instrumente extinse de control pentru utilizatori si permisiuni. Optiunile disponibile de automatizare si upgrade asigura cea mai buna integrare posibila cu structurile existente sau cu aplicatii terte bazate pe tehnologii standard.
