

COMPANIA DE TRADUCERI \* TRANSLATION COMPANY  
**INTART DESIGN SRL**

## Company Data

1. Company Name **S.C. „Intart Design” SRL**
- Tax IDNO: 1003600126542,*  
*VAT No.: 0505960*
2. Address **str. Alba Iulia 75, bl. V, sc. 1, of. 706, 712, 715, 716, MD-2071, Chisinau**
3. Legal address **str. Alba Iulia 202/2, of. 3, MD-2071, Chişinău**
- Director Natalia Conovca
4. Incorporation date **04.12.2003**
6. Phone +373 69970777, +37369089045
8. Email [natalia.conovca@gmail.com](mailto:natalia.conovca@gmail.com)
9. Company Type Private company
10. Founder and owner Conovca Natalia
11. No of employees 29 employees
12. **Services done in the last 7years**
- | Year        | No of translated pages | No of interpretation days | Rental of Equipment |
|-------------|------------------------|---------------------------|---------------------|
| <b>2016</b> | 13000 pages            | 690 man/days              | 0 days              |
| <b>2017</b> | 13500 pages            | 757 man/days              | 35 days/equipm      |
| <b>2018</b> | 13700 pages            | 823 man/days              | 120 days/equipm     |
| <b>2019</b> | 10500 pages            | 856 man/days              | 211 days/equipm     |
| <b>2020</b> | 10350 pages            | 458 man/days              | 67 days/equipm      |
| <b>2021</b> | 12500 pages            | 840 man/days              | 182 days/equipm     |
| <b>2022</b> | 13700 pages            | 1884 man/days             | 566 days/equipm     |
| <b>2023</b> |                        | 2900 man/days             | 968 days/equipm     |
13. Bank Data *B.C. „Moldova Agroindbank” SA, Suc. 1 Chişinău, BIC: AGRNMD2X885,*  
*MD03AG000000000225130641 (MDL)*  
*MD13AG0000000002251440867 (EUR)*
- Bank address MD-2012, str. Vasile Alecsandri 115

## **BOSCH SIMULTANEOUS INTERPRETATION SYSTEM**

**Bosch DCN Next Generation** is the main element of the digital conference management system, providing advanced features to ensure the successful, efficient and productive meetings.

The **DCN Next Generation System** has different options to ensure a perfect solution for your needs. Each unit is equipped with Bosch technologies, such as high-quality plug-in microphones or special speakers for perfect intelligibility, all of which are also completely immune to cell phone interference.

### **Advantages of the Bosch DCN Next Generation System:**

- Optimized structure and efficiency in meetings
- Reliability proven in the field
- 32 translation channels
- High intelligibility of speech
- Flexible interfacing with devices supplied by other manufacturers
- Easy system expansion with units connected by cable or wireless
- Award-winning, cutting-edge design

**DCN Next Generation System** can be expanded with the **Bosch Integrus system** to give delegates and the audience greater freedom of movement, translation languages can also be directed to Integrus pocket receivers.

## Bosch Integrus System

**Bosch Integrus** is a fully digital simultaneous infrared translation system that ensures high quality of sound, so that delegates understand everything that is being discussed. Thanks to Bosch IR-Digital technology, sound is transmitted exactly as it conveyed by interpreters.

The success of a conference with international participants is based on an efficient, real-time communication that can be provided with state-of-the-art equipment. The name Integrus is derived from the Latin word “integritas”, which means accurate language.

The receivers have **8 channels** and support 7 languages.

Participants can listen to the translation **via headphones**, which ensures even clearer sound, without any other noise or interferences from inside the conference room, and have the ability to switch and adjust the sound volume.

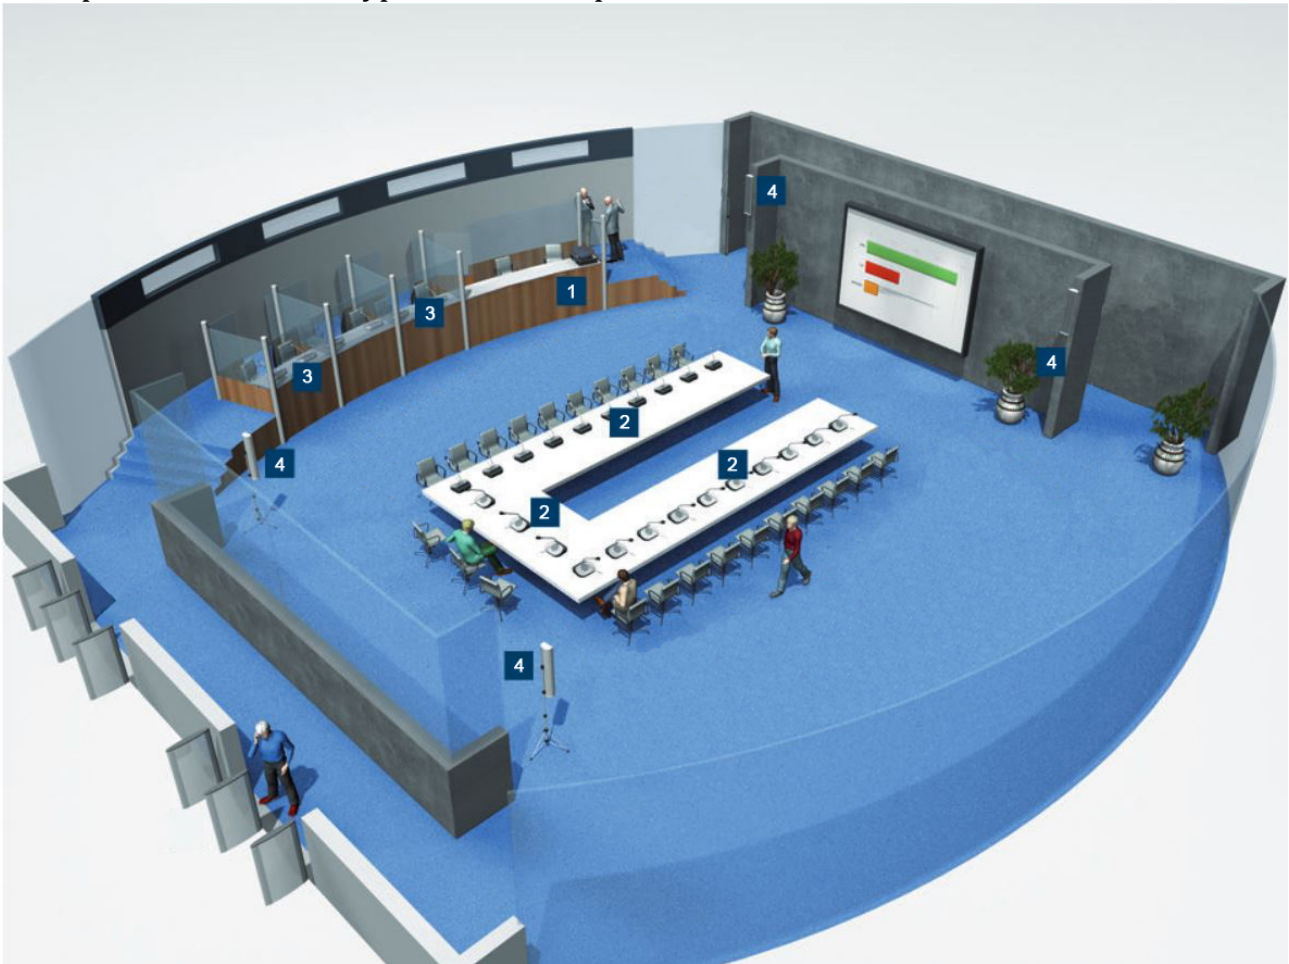

**Infrared systems** are ideal for multi-room conference centers, because the walls are impervious to infrared radiation, so there is no interference between different conference rooms.

### Advantages of Bosch Integrus system:

- High sound quality is ensured by using digital code correction methods;
- Monophonic or stereophonic transmission of speech and music;
- Can be installed in any room;
- Translations are transmitted via infrared waves, which eliminate interference from cell phones, wireless microphones and other sources;
- Confidentiality of discussions, as infrared radiation does not go through opaque obstacles;
- Free movement of participants;
- There is no interference from lighting systems, including those with brightness regulators;

## Types of placement

Example 1 – Tables in U-type or other shapes.

1. Central control unit
2. Discussion units
3. Interpreter Desks
4. Speakers

Example 2 – Mixed setup

1. Central control unit
2. Discussion units
3. Pocket receivers with headphones
4. Interpreter Desks
5. Infrared radiators
6. Speakers

Example 3 – Theatre type placement

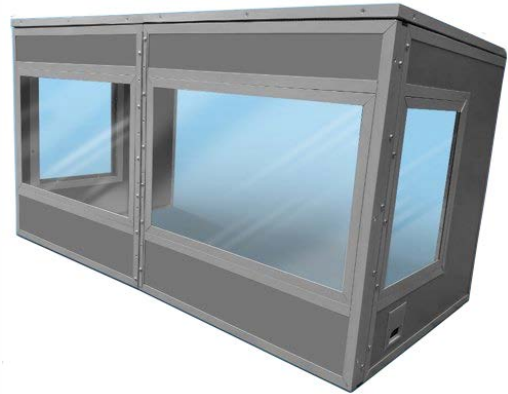

1. Discussion units
2. Microphone
3. Interpreter Desks
4. IR receivers with headphones
5. Infrared radiators
6. Speakers

We manage the entire process from delivery and installation to starting up the system and technical support throughout the event.

Our technician is ready to solve any issue to ensure the success of your event!
