

WINDOW SYSTEM ARCADE / Classically good

Boasting a clear, slender form and a high level of functionality the window system Arcade offers a **profile depth of 71 mm** to award windows high-stability and good thermal insulation. This all-round profile also allows builders and contractors with a restricted budget to benefit from a high-quality solution for contemporary building.

The good thermal insulation values additionally save energy and save money. The profiles of the line Arcade are technically well-proven classic designs and extremely popular due to their **excellent cost-benefit ratio**. With their elegant looks they also meet demanding design requirements. Arcade provides an economic, consistent and timeless solution for elegant windows and facades.

There are many different colours and designs for you to choose from: Arcade is available in two different designs with 20° bevels as classic offset or semi-offset round version.

Matching front doors and lift and sliding doors supplement the system.
