Chemi-Pharm AS
Pollu 132
EST – TALLINN 10917

Bremen, 26/02/2018

Summary: Virus-inactivating properties (limited spectrum virucidal activity) of Chemisept med of Chemi-Pharm AS according to EN 14476:2013+A1:2015 under clean conditions

This summary is based on the following test reports of Dr. Brill + Partner GmbH for the hand disinfectant Chemisept med produced by Chemi-Pharm AS:

adenovirus test report L17/0629cA.1 dating 26/02/2018

MNV test report L17/0629cM.1 dating 08/02/2018

The following concentration and exposure time are necessary for the inactivation of the two test viruses:

undiluted 30 seconds

in order to achieve a 4 log₁₀ reduction (inactivation ≥ 99.99 %) under clean conditions in a quantitative suspension test according to EN 14476:2013+A1:2015.

After evaluation with adenovirus type 5 and MNV the hand disinfectant Chemisept med can be declared as having "limited spectrum virucidal activity" according to EN 14476:2013+A1:2015.

The test for limited spectrum virucidal activity will cover all enveloped viruses (Annex A) and the specified test organisms.

Dr. Jochen Steinmann
