Version: 09.2025

Dear Colleagues,

INSTAND e.V., the Society for promoting Quality Assurance in Medical Laboratories e.V., has been conducting External Quality Assessment Schemes in all areas of in-vitro diagnostics as a reference institution of the German Medical Association since 1970.

As an External Quality Assessment organization, we are **accredited according to DIN EN ISO/IEC 17043**. We offer **nearly 400 External Quality Assessment (EQA) schemes/Proficiency Tests (PT)** for external quality control in laboratory diagnostics, in accordance with the current version of the German Medical Association (Rili-BÄK) guidelines. For this purpose, we ship around 165,000 sample sets annually to approximately 12,000 participating laboratories in nearly 80 countries.

We have optimized our **2026 INSTAND EQA Scheme Program** to meet the highest quality standards. Our new features at a glance:

- **Clinical Chemistry**

RV 180 Urine Chemistry Aminolaevulinic acid / Porphobilinogen

- **Molecular Genetics**

RV 727 NIPT - Determination of fetal RhD status

RV 752 ctDNA Tumour Panel

RV 822 CD19 CAR-T-Cells (quantitative)

The current PT/EQA scheme program is available on the **RV-Online System** and on our **Website**.

For 2026, we need to increase our price structure by an average of five percent due to rising purchase prices. Please note that we had to make a slightly higher price adjustment for a few proficiency tests.

We are excited to continue our excellent and pleasant cooperation with you.

CALIBRATION LABORATORY

Head: Dr. Patricia Kaiser
kaiser@instand-ev.de

Our calibration laboratory is accredited according to DIN EN ISO/IEC 17025:2018 and DIN EN ISO 15195:2019. We use internationally recognized calibration methods for the metrological traceability of measurement results for measurands in the field of laboratory medicine to SI units. In line with the requirements of the Rili-BÄK, target values in serum, plasma, whole blood, urine, and cerebrospinal fluid are determined in our laboratory as an evaluation standard in EQAS at the level of accuracy. In addition, we also offer our expertise in determining target values as a calibration service for the certification of control and calibration materials for external customers. Our calibration procedures and services are listed in the Joint Committee for Traceability in Laboratory Medicine (**JCTLM**) database.

INSTAND e.V.'s mission and vision

We promote quality in medical laboratories by offering a wide range of external quality control and continuous education.

Our vision is to improve the reliability of measurement results in medical laboratories worldwide.

In the Federal Republic of Germany, INSTAND e.V. is appointed by the German Medical Association as a reference institution for external quality assurance.

Accreditation

INSTAND e.V.'s versatile EQA program is accredited in all represented disciplines of laboratory diagnostics by the German Accreditation Body (DAkkS) according to DIN EN ISO/IEC 17043:2010.

Terms and conditions, FAQ

Our "General Terms and Conditions for Participation in INSTAND e.V. EQA Schemes" shall apply to all participants of the INSTAND e.V. EQA schemes.

These terms and conditions can be found at:
<https://instand-ev.de/instand-agb>

We would also be happy to send them to you upon request.

We have compiled answers to frequently asked questions in our FAQ:

<https://instand-ev.de/faq>

Fees for each INSTAND e.V. EQAS

Our prices are net prices which do not include VAT or shipping costs.

Taxes and custom duties shall be borne by the participant.

These prices apply exclusively to orders placed via INSTAND e.V.

Prices and services may differ for orders placed via distributors.

Scope of services

An EQA scheme includes the sample material, which is used to determine the measurement values by the participant, as well as a evaluation by INSTAND e.V. of the submitted EQAS results.

After evaluating the EQAS, participants who have submitted their results on time will receive an individual report, a general overview where applicable, a certificate of participation, and a certificate if they have passed.

In the event the EQAS is not passed, residual samples may be available after completion of the respective EQAS for a fee so you can check your test systems.

Information about the RV-Online Portal

A user account for our RV-Online system is required to participate in INSTAND e.V. EQA schemes:

<https://rv-online.instandev.de>

After signing into RV-Online, you will be able to manage your master data and orders, as well as enter your EQAS results, view reports and retrieve your certificates. On our new YouTube channel you will soon find in-depth videos that explain the various features of RV-Online in English and German.

EQA schemes required/not required by Rili-BÄK

The EQA schemes in orange in the table of contents contain analytes that require participation in accordance with the guideline of the German Medical Association on Quality Assurance in Medical Laboratory Examinations <https://bundesaeztekammer.de/>.

This orange labeling of the analytes required by Rili-BÄK is also found in the descriptions of the EQA schemes.

Validity of certificates

Certificates are dated with the closing date of the EQA scheme.

Certificates for parameters which must undergo an EQAS are valid for twice as long as the mandatory EQAS interval. Certificates for parameters which are not subject to an EQAS in accordance with Rili-BÄK are usually valid for 12 months.

Registration / cancellation deadlines

Orders can be changed or cancelled up until the respective registration/cancellation deadline. After the registration/cancellation deadline, it is no longer possible to change the order.

Shipment date

On the day of shipment, the packages will be picked up by the shipping service provider of our choice.

Before every delivery, our shipping service provider will send a tracking number by e-mail. This e-mail is always sent to the main user registered with RV-Online.

If you do not receive the samples by the day after the shipment date, please contact our customer service immediately.

Submission deadlines

EQAS results must be entered by midnight CET on the closing date. After the closing date, it is no longer possible to correct or change the values.

Volume pricing with a sample calculation

Many EQA schemes allow several sample sets to be ordered.

Starting in 2022 we will offer volume pricing for most of our EQA schemes.

Example*:

Falck / Niederau

100

Volume price per EQAS date:

1 EQAS: 55,00 €

from 2 EQAS: 46,00 €

Fee per EQA scheme incl. one evaluation.

**participation according to Rili-BÄK:
quarterly**

For a Group 100 order:

A single EQAS costs 55 € per EQAS date. When two or more sample sets are ordered, 2 x 46 € will be charged for the date, for three sample sets the charge will be 3 x 46€, etc.

Regardless of the number of EQAS and/or sample sets ordered, only one evaluation (incl. certificates, etc.) will be issued for the participant per EQAS date.

*These prices apply exclusively to orders placed via INSTAND e.V.

Prices and services may differ for orders placed via distributors.

Depending on the EQA scheme, further specific information may be available: i.e. infectious materials, suitable measuring devices, etc.

EQA schemes containing infectious material according to UN3373, biological substances category B, will be marked with the following symbol: ⓘ

1. Name of the EQA scheme
2. EQAS expert/deputy
3. EQAS group number
4. Information on the shipped sample material as well as how long the certificate is valid for.
Orange: for parameters required by Rili-BÄK, black: for parameters not required by Rili-BÄK.
5. EQA schemes also suitable for POCT
6. Parameters analyzed in the EQAS; parameters in orange required by Rili-BÄK.
7. List of the relevant dates, subdivided into EQAS dates (1 - 6). The month of the EQAS is always in reference to the closing date. The number of available EQAS dates may vary.
8. Details about pricing and availability of multiple sample sets.
9. Information about the frequency stipulated by Rili-BÄK.
10. CMS-approved PT schemes are marked

The following EQA schemes include analytes relevant to point-of-care testing (POCT) and are generally suitable for participation using corresponding POCT systems.

Please ensure that the sample matrix used in the EQA scheme is suitable for your test system. In case of uncertainty, we recommend contacting the manufacturer or supplier of your device.

CFTR gene ACMG classification Interpretation of results
 CFTR gene (NM_000492.4).

The 34 most common variants detected by standard screening methods will be tested. Participants must be able to identify at least the 34 most common variants. See here for a list of mandatory mutations: www.instand-ev.de/cftr-mandatory-mutations

Exception: Participants who only test the 31 variants of the child guidelines for CF. These participants are requested to communicate this in the comment field. Participants who only test for F508del cannot participate in this EQA scheme.

Participants who analyze the complete CFTR gene are also welcome to participate. These participants please communicate variants that are not among the 34 most common variants via the comment field. Participants are asked to comment on the possibility of CFTR modulator therapy.

from 2 RV: additional sample set not available

Proliferation index after stimulation with PHA, PMA/ionomycin, anti-CD3 and anti-CD3/anti-CD28 and evaluation.

Fee per EQA scheme incl. one evaluation.

Overnight delivery. The samples should ideally be stimulated and measured within 24-36 h after blood collection. The stimulants are not sent with the samples!

These prices apply exclusively to orders placed through INSTAND e.V.

This EQA scheme is intended for laboratories that perform lymphocyte proliferation assays to clarify lymphocyte dysfunction. Proliferation can be measured with cell tracer dyes, by 3H-thymidine incorporation or by MTT. Stimulation indices (3H-thymidine method and MTT) or proliferation indices (flow cytometric methods) and an evaluation can be reported.

For orders placed through distributors, prices and services may differ.

Shipping within the DACH region only

Samples : 4 samples of 0.3 ml Sample properties: Lyophilised cell suspension Shipping Information: Shipping at ambient temperature Certificate Validity: 12 months		Volume price per EQAS date: 1 RV: 631,00 € from 2 RV: additional sample set not available
Mixtures of 0 to 4 of the different pathogens specified in the panel are to be expected in the respective individual samples: Selection of Aeromonas spp., Campylobacter spp., <i>Clostridium difficile</i> (toxinogen), Enterohemorrhagic <i>E. coli</i> (EHEC / STEC), Enterotoxigenic <i>E. coli</i> (ETEC), Enteropathogenic <i>E. coli</i> (EPEC), Enteroinvasive <i>E. coli</i> (EIEC), Escherichia coli O157, <i>Salmonella</i> spp., Shigella spp., Vibrio spp., Yersinia enterocolitica In order to take into account the usually very different pathogen coverage of commercially available multiplex PCR/NAT concepts, each of the parameters listed above is certified separately as part of the evaluation. Only results from multiplex PCR/NAT test systems with a precisely specified test/kit designation are accepted. The parallel use of singleplex PCR/NAT detection methods for individual pathogens in the panel is not certified. The relatively broad spectrum of pathogen-specific EQA programmes for bacterial genome detection PCR/NAT is still available for this purpose.		Fee per EQA scheme incl. one evaluation. These prices apply exclusively to orders placed through INSTAND e.V. For orders placed through distributors, prices and services may differ.

Virus Genome Detection - Cytomegalovirus Program 2 - additional Training Program (can only be ordered with program 365)

Enders / Kammel

368

Samples : 4 samples of 1.5 ml
Sample properties: Lyophilised plasma
Shipping Information: Shipping at ambient temperature
Certificate Validity: 12 months

Polymerase chain reaction (PCR) and other nucleic acid amplification techniques (NAT) for CMV DNA

The training samples will contain virus concentrations which fall outside the requirements of the specified Rili-BÄK section B3.

The training program (368) can only be ordered together with the corresponding main EQA scheme (365) for March. Separate certificates will be issued for the training program (368) and the main EQA scheme (365, subject to Rili-BÄK-B3).

Polymerase chain reaction (PCR) and other nucleic acid amplification techniques (NAT) for simultaneous qualitative detection of gastrointestinal adeno, astro, entero, noro, parecho, rota and sapoviruses, respectively.

This program will be completed with currently circulating virus variants.

The requirements of the RiliBÄK (Guidelines of the German Medical Association on quality assurance in medical laboratory testing / Bundesärztekammer) will be considered for the detection of the above-mentioned pathogens.

This EQA scheme will contain each of the above-mentioned pathogens at least once a year. It is recommended to participate at both EQA scheme terms.

Please note: Only results of multiplex tests will be accepted for EQA scheme 430

This multiplex EQA scheme is not suitable for (i) 'singleplex' PCRs, (ii) tests for antigen detection, (iii) testing of sensitivity and (iv) typing. For this purpose, we refer to the INSTAND EQA schemes for the corresponding viruses.

Volume price per EQAS date:

1 RV: 574,00 €

Virus Genome Detection - Panel for Viral Meningitis / Encephalitis for Multiplex Tests

R. Kaiser / Kammel

433

Samples : 4 samples of 1.5 ml
Sample properties: Lyophilised cell culture material
Shipping Information: Shipping at ambient temperature
Certificate Validity: 12 months

Polymerase chain reaction (PCR) and other nucleic acid amplification techniques (NAT) for simultaneous qualitative detection of adenoviruses, cytomegalovirus, enteroviruses, Epstein Barr virus, herpes simplex virus type 1, herpes simplex virus type 2, human herpesvirus 6, parechovirus and varicella zoster virus, respectively.

This program will be completed with currently circulating virus variants.

The requirements of the RiliBÄK (Guidelines of the German Medical Association on quality assurance in medical laboratory testing / Bundesärztekammer) will be considered for the detection of the above-mentioned pathogens.

This EQA scheme will contain each of the above-mentioned pathogens at least once a year.
It is recommended to participate at both EQA scheme terms.

Please note: Only results of multiplex tests will be accepted for EQA scheme 433

This multiplex EQA scheme is not suitable for (i) 'singleplex' PCRs, (ii) tests for antigen detection, (iii) testing of sensitivity and (iv) typing. For this purpose, we refer to the INSTAND EQA schemes for the corresponding viruses.

Volume price per EQAS date:
1 RV: 811,00 €
from 2 RV: 771,00 €

Fee per EQA scheme incl. one evaluation.

These prices apply exclusively to orders placed through INSTAND e.V.
