

Matrice 300 Series TB60 Intelligent Flight Battery

OVERVIEW

The TB60 intelligent flight battery has a capacity of 5,935 mAh. It supports the hot-swap function allowing to change the battery without powering off the drone, which saves time and ensures smooth flight operation during critical tasks. The battery allows Matrice 300 RTK to fly 55 minutes without load. Visit DJI's official website for details.

TIPS

Never use damaged, leaking or swollen batteries. In any of these cases, contact DJI or designated dealers.
