

# OPTICA™ 10 MANUAL COLLIMATOR

## OVERVIEW

The Optica™ 10 is a manually operated collimator for integration with mobile and stationary radiography systems. The collimator is equipped with a long-life LED that projects a light field on the exposed area.

Aligning the detector under the X-ray beam is made easy with a single center bucky laser line or with double lasers in V-shape configuration as optical SID indication.

Beam filtration is possible with the optional filter module. Choose between: no filtration, aluminum filtration or aluminum + copper filtration.

The Optica 10 has an easily accessible internal USB port through which LED brightness, LED/laser timers and remote control can be configured.

The LED and laser can be controlled remotely via the Power and Communications connector by CAN protocol, digital I/O lines or RS232 (option).

## APPLICATIONS

- Mobile and stationary X-ray equipment for radiography up to 150 kV tube voltage.

## Technical Specifications

Application	Mobile and stationary X-ray equipment for radiography up to 150 kV tube voltage.
Shutters	Multilayer, 4 pairs of shutters in 2 layers.
Mode of operation	Manual
Collimation	Maximum field size: 43 x 43 cm at 1m SID
Attenuation Equivalent IEC 60601-1-3; \$3.8 / \$7.3 / \$7.4	2.0 mm Aluminium equivalent (at 75 kVp, HVL 2.2 mm)
Added Filtration (optional) IEC 60601-1-3; \$3.3 / \$7.3 / \$7.5;	Models with filter unit include a manual operated filter disk with 4 positions. Example filter combination: <ul style="list-style-type: none"> <li>◆ No added filter</li> <li>◆ 2 mm Al</li> <li>◆ 1 mm Al + 0.2 mm Cu</li> <li>◆ 1 mm Al + 0.1 mm Cu</li> </ul>
Laser (optional)	Single bucky center line laser, Class 2 Or: double lasers, Class 2. Lines coincide on table when SID=1m
Light Source	White LED (≈5000K), adjustable luminosity. Light source can be controlled by push button, external signal ("on/off") and CAN-bus.
Timers for light field and laser(s)	Configurable timer, ≈10 seconds to ≈90 seconds. Factory setting: ≈30 seconds
Light Field Illuminance IEC 60601-2-54; \$203.8.102.5	160-230 lx 1m from focus, 35x35 cm. Factory setting ≈ 200 lx. Light field intensity and timer can be set via USB connection.
Light field contrast IEC 60601-2-54; \$203.8.102.5	4:1 at 1 m from focus, collimated to 35x35 cm
Leakage radiation	0.5 mGy/hr at 1m from focal spot, with 150 kVp, 4 mA
Mounting distance (mounting plane to focal spot)	80 ± 1mm
Accessory rails	Two accessory slots, 178 mm wide x 2 mm high. Optional: two accessory slots of 150 x 2 mm
Power Supply	DC model: 24 VDC; 24 VA AC/DC model: 12-45 VDC; 24 VA or 20-30 VAC; 35 VA; 50/60 Hz
Weight	6.0 kg
Operating conditions	Ambient temperature +15°C ≤ T ≤ +40°C; Relative humidity 30% ≤ RH ≤ 75%; Altitude ≤ 3000 m
Compliance	Conforms to the requirements of FDA (Class II) and the European Medical Device Directive (CE Mark, Class IIb)

## MORE INFORMATION

Varex Imaging Corporation is a leading innovator, designer and manufacturer of X-ray imaging components, which includes tubes, digital flat panel detectors and other image processing solutions, which are key components of X-ray imaging systems.

For more information, please contact a Varex Imaging sales representative in your territory. Contact details are available at [www.vareximaging.com/contact-information](http://www.vareximaging.com/contact-information).

**Headquarters**  
Salt Lake City, UT 84104
