

## **TECHNICAL DATA** for **S<sub>IDA</sub>-VISC™ 1.0%** **SODIUM HYALURONATE OPHTHALMIC SOLUTION**

Ref. No.	10000 (1 mL) 10010 (1.5 mL)
Brand Name	S <sub>IDA</sub> -VISC 1.0%
Description	S <sub>IDA</sub> -VISC 1.0% is a clear, colorless, odorless, sterile, isotonic, viscoelastic solution for intraocular use.
How Supplied	S <sub>IDA</sub> -VISC 1.0% prefilled glass syringe of 1 mL or 1.5 mL volume, packed in blister and sterilized by steam.
Intended Use	S <sub>IDA</sub> -VISC 1.0% is indicated for use as a space occupying tissue protective fluid and lubricant during various intraocular surgical procedures including intra-/ extracapsular cataract extraction, IOL implants and corneal transplantations. In surgical procedures in the anterior segment of the eye, instillation of the S <sub>IDA</sub> -VISC serves to maintain a deep anterior chamber during surgery, allowing for efficient manipulation with fewer traumas to the corneal endothelium and other surrounding tissues.
Feature	The viscoelastic solution has a molecular weight of 3.000.000 - 3.600.000 Dalton, viscosity 20.000 – 70.000 mPas (cohesive), a pH of 6.8 – 7.6, and an osmolality of 270 - 400 mOsm/kg.
Certification	<b>CE</b> 2803
Classification	Class IIb, according to Annex IX of Council Directive 93/42/EEC
Conformity	MEDDEV 2.4/1 Rev. 9 - June 2010 Rule 8
Applicable Standards	ISO 9001, ISO 13485, ISO 14971, ISO 11607, ISO 10993, ISO 17665, ISO 11737, ISO 14644, ISO 15798, ISO 15223
Depiction	
Primary Packing	1 mL or 1.5 mL pre-filled syringe with one Viscoelastic Cannula 27G
Secondary Packing	Individual Box
