

## Blood Lancet

- When blood sample is required to be received for blood sugar measuring, it is a sterile driller having a sharp tip.
- Produced from carbon-steel.
- Adoptable with all blood lancet devices.

### What is a blood lancet?

Blood lancet is used to take blood sample for measurements such as sugar and cholesterol. Although it is used for different purposes, it is mostly used by diabetics. It has a design that causes minimal damage to the skin.
