Bio-Medicus Life Support™ Catheters

Individualized ECLS care

Indicated for long-term† ECLS

†21CFR870.4100.

For the full range of patients you treat.

Bio-Medicus Life Support portfolio is part of our ongoing commitment to ECLS.

As ECLS therapy evolves and expands, so does the variety of patients you treat. This makes it challenging to provide the best individualized care for each patient.

The Bio-Medicus Life Support catheter portfolio helps address many of these challenges.

Developed with extensive user input, the Bio-Medicus Life Support catheter offers more lengths, sizes, and configurations than any other brand, giving you the choices you need to individualize your patient's ECLS care.

Designed for performance¹

Optimizing flow

Thin, kink-resistant wall design promotes optimized flow rates.

Ease of insertion

Features such as fingerlet tip supports create a no-step transition allowing for smooth insertion.

Configuration options

We developed the Bio-Medicus Life Support catheter by listening to the needs of ECLS physicians regarding technique and configurations.

Veno-venous

FEMORAL-FEMORAL VV

Femoral-venous drainage
Femoral-venous return

FEMORAL-JUGULAR VV

Femoral-venous drainage
Jugular return

Advanced biostable material

Bio-Medicus Life Support cannulae are made with Elast-Eon™, a biocompatible and biostable polyurethane/silicone copolymer.†

Elast-Eon is commonly used in prolonged-use and implantable medical devices, including ECLS dual lumen catheters.

†Elast-Eon™ is a siloxane urethane copolymer.

¹ Bench data on file, may not be indicative of clinical performance.

Veno-arterial

FEMORAL-FEMORAL VA

Femoral-venous drainage
Femoral-arterial return

JUGULAR-FEMORAL VA

Jugular-venous drainage
Femoral-arterial return

More sizes. More lengths. More options.

Drainage or return catheters – Flex

Used for VA or VV configurations

Designed for drainage or return at different insertion lengths, with side holes only near the tip

Flex Up to 18 cm insertion length (See Figure A below for flow data)

Side holes near tip

Flex XL 50 or 55 cm lengths to assist in targeted vascular locations

Radiopaque¹
Suture collar

Depth markings
For visualizing insertion length

Drainage catheters – Multi

Designed for efficient drainage and optimized flow dynamics¹

Multi 38 cm length for drainage from inferior vena cava

Extended introducer
Facilitates ease of insertion

Multi XL 55 and 61 cm lengths; longer insertion length allows various tip placements to support drainage flow

Marker band
Indicates that all side holes are inserted at minimum depth within vein

¹ Bench data on file, may not be indicative of clinical performance.

Drainage or return catheters – Mini

For catheter placement configurations that require smaller sizes and shorter insertable lengths

Mini 10–11.5 cm for return

No side holes at tip

Mini 10–11.5 cm for drainage

Side holes only at tip

Bio-Medicus Life Support offers catheter options so that you have the flexibility to uniquely treat each patient – smallest to largest, youngest to oldest – with varying extracorporeal support needs.

- French sizes 9 to 29
- Insertion lengths from 10 to 61 cm
- Configurations for VA and VV ECMO or ECLS

Flex XL return/drainage catheters LS96550-, LS96555-¹

Multi and Multi XL drainage catheters LS96438-, LS96355-, LS96360-¹
