# Company Profile

Laftan International is the name of your confidence and satisfaction, we strengthen our position as a leading Manufacturer and Exporters of Surgical, Dental Instruments and Medical Device, we understand that precise instruments are of crucial importance for an outstanding treatment results. So when you choose our products, you will discover a dynamically balanced.

Laftan International has been honored with ISO9001:2008, ISO13485:2003 Certificates & Authorized CE marking and cGMP - FDA approved. Our quality Assurance departments carry out the entire necessary test, inspections and process control activities to ensure that there is no any problem with the products.

The R & D department is independent and encouraged by the top management to bring innovation in material and design in order to meet the future challenges.

Our products are made only with the high quality material stainless steel and the top quality is guaranteed. As our quality speaks for itself.

We are also child labor free organization. The management is strictly prohibits, the use of child labor in the production of its all sort of products and carrying most modern machines in all type of departments to meet the current and potential demand of the customers.

There is no any compromise on workmanship; we hire very skilled and qualified staffs, which make us able to produce right products at right way.

We give to our customer the GUARANTEE, that our products are reliable in use even after using it up till extended period of time.

Our company head office doing their activities Sialkot Pakistan (The city of Medical devices).

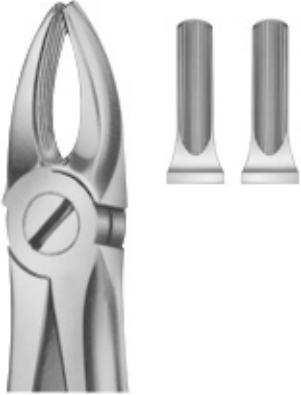

**Our Purpose:**

To produce the right products, at the right price, at the right time.

**Commitment:**

Quality, Satisfaction, Productivity, Growth & Prosperity.

Probes are precision fabricated to provide accuracy for intraoral gauging. Probes with extra fine, sharp points for diagnosing tartar or concretions, caries, filling and tooth morphology. All probe instruments are designated in millimeters. Avoid temperature above 200°C / 398°F, at which point your Hi-Lite Probe markings may become discolored.
