

Zephyr® Fingerprint Brush

The Zephyr® Fingerprint Brush is 6.5" and consists of thousands of fiber bundles. The Zephyr® brush has a long life with the capacity to pick up and retain large amounts of fingerprint powder. Rather than wear out over time, the filament ends actually become softer with each use.

- ✓ No Coarse Fibers
- ✓ No Natural Oils
- ✓ Becomes Softer with Each Use

1-0200	The Original Zephyr® Fingerprint Brush

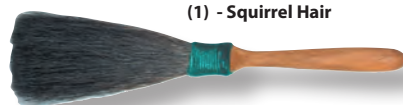

Powder Brushes

Our powder brushes feature long, soft, non-abrasive bristles, made from the finest blue squirrel and goat hair.

These brushes are ideal for developing delicate and fragile latent prints with our regular powders.

55310	(4) Camel Hair Brush w/ Storage Tube	7"

(1) - Squirrel Hair

(2) - Squirrel Hair

(3) - Goat Hair

(4) - Camel Hair

Magnetic Applicators

Our magnetic applicators are designed for use with our magnetic and fluorescent magnetic powders. Like magic, a cluster is formed at the end of the wand, creating a brush. Our Mega-Mag™ applicator's 3 inch platform holds 15 times the amount of powder as any other applicator on the market. The Spring-Loaded Forensic Wand is technologically genius. It won't roll off a table, and the spring-loaded feature enables you to have one-handed application with the flick of the thumb. What's even cooler is that our magnetic applicators help alleviate damaging or scratching the latent print you worked so hard to develop!

Item #	Description
05551	(1) Regular Magnetic Applicator, Red
05554	(2) Regular Magnetic Applicator, Black
35555	(3) Spring-Loaded Forensic Wand
07555	(4) Mega-Mag Applicator
