

Wallace IUI

The Wallace IUI catheter is a premium quality device featuring a smooth tip and formable outer sheath for optimal control over placement within the uterus. The two-piece design replicates the Wallace Classic catheter and is also suitable for embryo transfer technique training.

- Flexible outer sheath with memory, can be pre-curved to aid insertion
- Smooth rounded tip to minimize trauma and maximize success rates
- Similar catheter design to Wallace Embryo Transfer catheter range, helping develop an effective technique
- Bilateral side eyes for maximum dispersion of sperm and minimal risk of blockage
- Compatible with the Wallace stylet for difficult procedures

Product Configurations

- Intra-uterine insemination catheter (18cm)
- Malleable Stylet - for difficult transfer (18cm)

Technical Information

Inner catheter (ID)	1.07mm
Inner catheter (OD)	1.58mm
Outer sheath outer diameter (OD)	2.3mm
Stylet protrusion from outer sheath	2.0mm
Volume of catheter not including hub (18cm)	0.17mm
Volume per cm of catheter	0.009mm

Product Compatibility and Order Codes

Intra-uterine Insemination

Compatible with:

AIC18
Quantity: 10
Intra-uterine Insemination catheter (18cm) } S1

1816ST

Quantity: 10. Stylet for introducing the 18cm ET catheter

- = Compatible

CE marked in compliance with EU medical device directive
