Immediately remove all soiled and contaminated clothing  
Wash hands before breaks and at the end of work.  
Avoid contact with the eyes.  
Avoid contact with the eyes and skin.
- **Respiratory protection:**  
In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.
- **Protection of hands:**  
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.  
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- **Material of gloves**  
Hand protection: Protective gloves made of plastic or rubber (EN 374).  
[The selection of a suitable glove depends not only on the material, but also on the wearing conditions and other conditions of use and other quality features and varies from manufacturer to manufacturer. Penetration times, permeation rates and degradation of the respective materials are from the protective glove manufacturer and must be taken into account during wear. Before each re-use of the glove the glove must be checked for leaks. To avoid skin problems, the wearing of gloves should be reduced to the minimum necessary. Of the usual materials for protective gloves, butyl rubber, nitrile rubber and PVC appear to be suitable].
- **Penetration time of glove material**  
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
- **Eye protection:**

Tightly sealed goggles
