greiner bio-one

Sapphire **PCR Consumables**

PCR At Its Best

Sapphire PCR Consumables

PCR At Its Best

Greiner Bio-One features its new PCR product line under the brand name Sapphire. The Sapphire PCR product portfolio comprises a full range of PCR reaction vessels and microplates for all major PCR applications.

Key Facts:

- Manufactured out of medical-grade polypropylene without interfering additives
- Thin-walled for efficient heat transfer during amplification
- Free of detectable DNase, RNase, human DNA, endotoxin and PCR inhibitors
- Suitable for real-time / quantitative PCR
- Comprehensive thermal cycler compatibility
- Packaging labelled with product symbols for easier identification and warehousing

Figure 1: Inner packaging for Sapphire PCR products and label with product drawing.

PCR Tubes (0.2 / 0.5 ml)

- With flat or domed cap or without cap
- Available in different colours (white, red, blue, green, yellow, purple and assorted)
- Frosted tube caps for easy labelling

!

Free samples

of the new PCR products can be ordered on our website www.gbo.com or via e-mail to info@de.gbo.com.

Figure 2: 0.2 ml Sapphire PCR tubes with domed lid in different colours.

Figure 3: Dimensions of the Sapphire PCR tubes

Sapphire PCR Consumables

8-Tube Strips and 8-Cap Strips

Sapphire PCR 8-tube strips are especially beneficial for research applications as they allow improved sample handling when moderate sample numbers make the use of 96 well microplates inefficient. The Sapphire PCR 8-tube strips can be readily closed by the removable PCR 8-cap strips which are available in two versions, with domed lids for standard PCR or with flat lids for real-time PCR applications. Manufactured out of ultra-clear, virgin polypropylene the Sapphire PCR 8-cap strips guarantee reliable and reproducible PCR results (Figure 4).

8-Tube Strips (0.2 ml)

- Available in different colours (, , , , , and assorted)
- Comprehensive thermal cycler compatibility
- Suitable for 8-cap strips

8-Cap Strips

- Flat ultra-clear 8-cap strips for real-time and quantitative PCR
- Domed 8-cap strips available in different colours (, , , , , and assorted)

2 Fit All - For 8-Cap Strips

Both 8-cap strip versions are compatible with all Sapphire 96 well PCR microplates and Sapphire 8-tube strips.

Figure 4: Real Time PCR in Sapphire 8-tube strips (cat. no. 673 210) closed with the appropriate Sapphire 8-cap strips with flat lid (cat. no. 373 250). Increase of fluorescence in dependence to cycle time and DNA concentration.

Figure 5: A) Sapphire 8-cap strips (domed) and Sapphire 8-tube strips B) Sapphire 8-cap strips (flat) for real-time PCR

Figure 6: Dimensions of the Sapphire PCR 8-cap strips and 8-tube strips

Sapphire PCR Consumables

8-Tube Strips (0.2 ml) with individually attached caps

The classical Sapphire PCR 8-tube strips are now also available with individually attached caps.

The angular attached domed (**Fig. 7A**) or flat (**Fig. 7B**) caps can be closed and opened individually minimising the risk of cross contamination. Moreover, individual closing and opening helps to avoid pipetting errors and facilitates sample processing. The 8-tube strips can be split into smaller sections hence the number of required tubes can be adjusted to the sample number.

The 8-strip tubes are available with attached domed caps for standard PCR or with attached ultra clear flat cap for real-time PCR.

8-tube strips (0.2 ml) with individually attached domed caps for standard PCR:

- Manufactured out of medical-grade polypropylene without interfering additives
- Uniform thin walls for homogenous temperature transfer
- Universal fit for many PCR systems
- Combines single tube features with strip tube handling features
- Packed in stacks of 12 x 8-tube strips in a resealable bag
- Proven PCR quality (Free of DNase, RNase and human DNA, non-pyrogenic)

8-tube strips (0.2 ml) with individually attached flat caps for realtime PCR:

- Manufactured out of medical-grade polypropylene without interfering additives
- Uniform thin walls for homogenous temperature transfer
- Universal fit for many PCR systems
- Combines single tube features with strip tube handling features
- Packed in stacks of 12 x 8-tube strips in a resealable bag
- Proven PCR quality (Free of DNase, RNase and human DNA, non-pyrogenic)

Figure 7:

B) 0.2 ml Sapphire PCR 8-Tube Strips with individually attached flat caps
Cat. No. 608 281

Sapphire PCR Consumables

Low Profile 8-Tube Strips (0.1 ml) for FAST PCR

Sapphire PCR tubes are also available as low profile tubes ideal for FAST, standard and real-time PCR supporting the reduction of cycle time and sample volume without any compromises in accuracy and efficiency.

Sapphire PCR low-profile tubes provide a well volume of 0.1 ml. This leads to a reduced dead volume between sample and heated lid. The condensation on the walls of the PCR reaction tubes during PCR is minimised resulting in lower evaporation rates.

Sapphire PCR tubes are recommended for volumes below 20 µl and have a universal fit for many FAST, real-time and standard thermal cyclers. When used in FAST PCR, Sapphire PCR tubes help to reduce the cycle time.

Sapphire Low Profile PCR 8-tube strips with optically clear single attached flat caps for Realtime PCR

The 0.1 ml low profile 8-tube strips with angular attached flat caps allow individual closing and opening of the sample tubes reducing the risk of cross contamination. The solid interwell connections increase the rigidity of the strips reducing the risk of spillage. The flat optically clear caps ensure that fluorescence signals in real-time PCR pass through unaffected.

Figure 8: Fit of 0.1 ml low profile and 0.2 ml standard PCR tubes in an ABI 9700 PCR Thermal Cycler. The adjustable lid of the cycler allows the use of 0.1 ml low profile tubes. The reduced height of the low profile tubes minimises the gap between heated lid and reaction mix resulting in lower evaporation and higher accuracy of the polymerase chain reaction

Figure 9:
A) 0.1 ml Sapphire PCR Low Profile 8-Tube Strips with attached caps
Cat. No. 671 221

Key Facts:

- Optimal for FAST PCR
- Manufactured out of medical-grade polypropylene without interfering additives
- Thin-walled for homogenous temperature transfer
- Uniform wall thickness resulting in low evaporation rates
- Provides a universal fit for standard and FAST thermal cyclers
- Allows for reaction volumes below 20 µl saving reagents consumption
- Increased efficiency without compromises in accuracy
- Available with single flat lid attached or with ultra clear flat cap strips both allowing real-time PCR

Sapphire Low Profile PCR 8-tube strips, with optically clear flat 8-cap strips for Realtime PCR

The 0.1 ml low profile 8 tube strips with optically clear flat 8-cap strips allow easy and time saving closing and opening of the sample tubes. The flat optically clear caps ensure that fluorescence signals in real-time PCR pass through unaffected.

Tubes and cap strips come as real-time combo pack including 125 x 8-cap strips and 125 x 8-tube strips.

B) 0.1 ml Sapphire PCR Low Profile 8-Tube Strips with 8-Cap Strips
Cat. No. 673 281

Sapphire PCR Consumables

96 and 384 Well PCR Microplates

The Sapphire PCR product line includes a full range of 96 and 384 well PCR microplates including a new low profile universal fit 96 Well PCR microplate for FAST PCR applications.

Key Facts:

- 96 well without skirt, half-skirt and full-skirt
- Comprehensive thermal cycler compatibility
- Suitable for 8-cap strips, adhesive sealers and heat-sealing
- High-visibility alphanumeric printing for rapid sample identification
- Packaging labelled with product symbols for easier identification and warehousing

96 Well Low Profile Microplate

Sapphire PCR Microplates are now also available as low profile microplates for FAST, standard and realtime PCR supporting the reduction of cycle time and sample volume without any compromises in accuracy and efficiency.

The wells of the low profile microplate hold a well volume of 0.1 ml. This leads to a reduced dead volume between sample and heated lid. The condensation on the walls of the plate during PCR is minimised resulting in lower evaporation rates. The Sapphire PCR low profile microplate is recommended for volumes below 20 µl and has a universal fit for many FAST, realtime and standard thermal cyclers.

Key Facts:

- Black alphanumeric coding
- Chamfer on H12 position
- Universal fit (non-skirted / flat surface suitable for adhesive sealers)
- Suitable 8-tube strip caps cat. no. 373 250

96 Well PCR Microplates without skirt

96 well Sapphire PCR microplate without skirt (652 201)

96 well Sapphire PCR microplate without skirt, flat, universal (652 250)

96 well Sapphire PCR microplate without skirt, low-profile (652 210)

96 Well PCR Half-Skirt and Full-Skirt Microplates

96 well Sapphire PCR microplate half-skirt, ABI design (652 260)

96 well Sapphire PCR microplate half-skirt, suitable for ABI (652 290)

96 well Sapphire PCR microplate half-skirt, suitable for LightCycler® (669 285)

96 well Sapphire PCR microplate full-skirt (652 270)

384 Well PCR Microplates

384 well Sapphire PCR microplate full-skirt (785 201)

384 well Sapphire PCR microplate full-skirt, suitable for ABI (785 290)

384 well Sapphire PCR microplate full-skirt, suitable for LightCycler® (785 285)

Adhesive Sealers for PCR

Real-time PCR and various other methods for fluorescence measurements are common techniques in diagnostics, research and high throughput screening. As fluorescence detection is usually performed through lids, caps or other covers to prevent sample evaporation, the quality of the cover is essential for the quality of the measurement. Low background, homogeneous signal strength and reduced evaporation are the main prerequisites.

SILVERseal™

SILVERseal™ is an extremely robust, heat-resistant and pierceable aluminium film coated with a pressure-sensitive acrylate adhesive.

- Temperature-resistant from -80 °C to +110 °C
- Ideal for PCR applications
- Ideal for the storage of sample material and active agents
- Remains flat, when removed from its paper backing, and can thus be easily applied to all microplate types
- A double perforation makes it possible to tear off the projecting adhesive sealer and thus improves the stacking of sealed microplates

VIEWseal™

VIEWseal™ is a special highly transparent sealer with low autofluorescence for precise optical measurements. The pressure-sensitive silicone coating will only adhere where pressure is applied.

- Excellent optical clarity
- Air-tight sealing of microplates
- Reliable sealing during long-time storage
- Coated with silicone adhesive
- Easy to reseal
- Does not stick to finger or gloves
- Temperature-resistant from -70 °C to +100 °C

Figure 11: Adhesive sealers for PCR
A: SILVERseal™; B: VIEWseal™ (left) and AMPLIseal™ (right)

AMPLIseal™

AMPLIseal™ is a pressure-sensitive adhesive film that exhibits low autofluorescence, especially in the wavelength range important for real-time PCR. AMPLIseal™ is capable of sealing skirted and non-skirted PCR microplates as well as any other standard microplates. Consisting of a low autofluorescent polypropylene film, AMPLIseal™ is coated with a pressure-sensitive acrylate adhesive that is protected by a transparent polyester liner. Double-perforated sides enable elimination of unwanted sealer extensions beyond the plate surface. While the powerful adhesive force of AMPLIseal™ does not affect PCR reactions or fluorescence measurements, it guarantees a tight closure for the sealed microplate.

- Temperature resistant from -20 °C to +110 °C
- Low autofluorescence
