Re: NSDD Certification

To Whom It May Concern:

On behalf of Rapiscan Systems Ltd in relation to the current tender for service on equipment that requires NSDD certification. Rapiscan Systems Ltd. together with the Original Equipment Manufacturer (OEM) Rapiscan Systems Inc., are wholly owned subsidiaries of OSI Systems. As a representative of both Rapiscan Systems Ltd. and Rapiscan Systems Inc. we wanted to provide clarification on the NSDD requirement.

The NSDD certification was developed by PNNL using our training materials and manuals, with only slight modifications to create their certification. As the OEM of the equipment, Rapiscan and its sister companies never need or take a 3rd party's certification on our own equipment. We have provided an employee who has that certification, but the only reason he does was because he supported a class for PNNL and as part of that they provided him with the certification.

As the OEM, we believe that we do not require the NSDD certification as it is a certification of knowledge and experience on our own equipment from a 3rd party who is not as qualified as Rapiscan to provide that certification.

If you have any questions, please let me know and I would be more than happy to answer them.

Sincerely,

Timothy Hines
Sr. Director, Global Cargo Service Business Development
