A large industrial machine, likely a medical device manufacturing machine, is shown in the background. It has a green and black body with a control panel featuring a digital display and several buttons. A large green and blue diagonal graphic element is overlaid on the left side of the page.

About Octamed

Established and headquartered in 2011, Istanbul / Turkey, Octamed is an incorporated company dedicated in designing, manufacturing and marketing of medical devices and disposables mainly for hospitals, pharmacies and comprehensive range of medical facilities.

The company was fundamentally structured on a new customer-focused approach. Product quality and performance have always been a priority across our organization and thanks to our highly qualified and dedicated staff, we have maintained an international standard and established ourselves as one of the major players in the health care market. In addition to products manufactured in house, Octamed is successfully representing world leading brands such as Rossmax and Cutanplast in Turkey.

The success in such short time was not a surprise since for Octamed because the company has already been on a 40 year journey filled with know-how, experience and successes.

Continuously striving to provide exceptional quality and value, to distinguish itself with integrity, transparency and trust; Octamed is aiming to establish long-lasting relationships with his clients who share these values. From the first day we opened our doors, we have been providing a broad range of portfolio of high quality and value-oriented products, solutions and services in more than 50 countries worldwide and we look forward to continuing to expand and grow our market share.

SURGICAL TAPES

- ◆ Cotton Surgical Tape
- ◆ Silk-Like Surgical Tape
- ◆ Microporous (Paper) Surgical Tape
- ◆ Transparent PE Surgical Tape
- ◆ Transparent PU Surgical Tape
- ◆ Elastic Non-Woven Surgical Tape

Cotton Surgical Tape

Constructed from plain cotton fabric with an adhesive containing zinc oxide which is added to provide long-term adhesion and to help prevent infection. Used for many different applications such as securing bulky dressings, stabilization of finger splints, fastening devices of catheters and I.V. tubing. Non-irritating adhesive for easy removal, making it a great for post-surgery applications and frequent gauze changes.

Specifications / Key Features

- ◆ Strong adhesion that is gentle to the skin
- ◆ Durable and conformable
- ◆ Easy tear by hand in width and lengthwise
- ◆ Low irritation
- ◆ X-Ray permeable
- ◆ Allows for moisture evaporation and skin to breathe
- ◆ Leaves no residues when removed
- ◆ Non-Sterile

Transparent PU Surgical Tape

Constructed from transparent polyurethane film. Used for many different applications such as stabilization of finger splints and fastening devices of catheters and I.V. tubing. Adapts to the shape of the body and ensures freedom of movement. The backing paper ruled into 1 cm squares makes it easy to cut the surgical tape into complicated shapes for tube fixing. Has included a split liner for the backing paper so that the surgical tape can be easily handled without touching the adhesive surface.

Specifications / Key Features

- ◆ Good adhesion to skin and tubing for securement
- ◆ Prevents contamination, reducing the risk of infection by bacteria
- ◆ Soft and Comfortable
- ◆ Water-resistant
- ◆ Hypoallergenic adhesive for patients with sensitive skin
- ◆ X-Ray permeable
- ◆ Leaves no residues when removed
- ◆ Non-Sterile

Cotton Gauze Bandage

Gauze bandage is woven from 20 threads, 100% cotton yarn. Its woven structure allows the skin to breathe and the wound to remain clean. Thanks to its high absorbency, it captures moisture in the wound area. It is suitable for fixing dressing materials and preventing swelling in fractures.

Specifications / Key Features

- ◆ High absorbency
- ◆ Light and soft texture for continuous use
- ◆ Durable, used to immobilize a broken bone
- ◆ Edges are knitted
- ◆ Non-Sterile. Should not be used on open wounds
- ◆ Individually packed

Conforming Gauze Bandage

Elastic gauze bandage containing %48 Polyamide and %52 Viscose. Used as a supportive dressing in cases requiring light compression. Its soft, light and elastic texture wraps the skin tightly in the injuries requiring support. It is extremely comfortable thanks to its special soft texture that does not stick to the wound. Thanks to its porous structure allows the skin and the wound to breathe. Conforms easily to all body contours. Elasticity rate is %100.

Specifications / Key Features

- Soft and durable structure ◆
- Comfortable use ◆
- Thanks to its elastic feature adapts body contours easily ◆
- Ergonomic to use and does not slip ◆
- Non-Sterile. Should not be used on open wounds ◆
- Individually packed ◆

Crepe Elastic Bandage

Used as a supportive dressing in cases requiring compression. It is suitable for preventing swelling in fractures and increasing immobility. It helps protect the injured area from external factors. It has 80% elasticity.

Specifications / Key Features

- ◆ Produced from viscose and polyamide yarn
- ◆ Its soft and durable structure provides comfort in application
- ◆ Thanks to its elastic feature conforms easily to all body contours
- ◆ It has an ergonomic use and does not slip
- ◆ Its porous structure allows the wound and skin to breathe
- ◆ It is extremely comfortable thanks to its special soft texture
- ◆ Comes with bandage clips for a convenient method of fastening the bandage
- ◆ Individually packed
- ◆ Non-Sterile

Cohesive Bandage

Provides support, reliable compression and warmth for weak or injured limbs and joints. Coheres to itself and not to the skin, hair or other materials which makes it more comfortable to wear than adhesive tape especially when strapping hairy parts of the body. Able to stretch to up to double its un-stretched length which allows for a great amount of adaptability when choosing the level of compression needed.

Specifications / Key Features

- Adheres to itself, never skin or hair ◆
- Pins, clips or tape are not needed ◆
- Hand-tears to desired length for easy application ◆
- Excellent for use in applications requiring securing, protection and support ◆
- Excellent conformability ◆
- Lightweight and durable ◆
- Available in different colors ◆

BLOOD STOPPERS

◆ Gelatin Sponges

CUTANPLAST®

Sterile Re-Absorbable Haemostatic Gelatin

Easy to Use

**Different Sizes
and Format**

Easy to Cut

Cutanplast® is a sterile re-absorbable gelatin sponge with a powerful haemostatic effect: the porous surface of the gelatin induces the rapid rupture of the blood plaques with the consequent activation of the enzymatic cascade, which leads to natural coagulation.

CLASSIFICATION ACCORDING TO EUROPEAN DIRECTIVE 93/42/CEE:
"Medical Device" Class III implantable.

CUTANPLAST®

Gelatin Sponges

Cutanplast Standart

Each sponge is individually packed in double sterile blister which are packed in boxes of 20 units. Suitable for the following surgeries:
Parenchymal surgery, Thoracic surgery.

Specifications / Key Features

- Completely absorbed when left in situ
- Does not cause allergic reactions
- Has a neutral pH
- Absorbs blood corresponding to approximately 50 times its own weight
- May be applied dry
- May be soaked with sterile physiological solution or with antibiotics
- Can easily be reduced in size to any required format
- Reduces the time of the surgical intervention
- Stops the hemorrhage
- Easy to use
- Practical
- Safe
- Reliable
