Product Usage

Centrifuge tubes are used to contain liquids during centrifugation, which separates the sample into its components by rapidly rotating it around a fixed axis.

Features

- Full range volumes from 0.1ml to 50ml, apply to different solutions;
- Different bottom shapes and cap types for various testing purpose;
- Made of high quality polypropylene raw material, enables excellent view of tube contents;
- Clear printing graduation or mold graduation and big writing area makes easy reading and recording;
- Brown tubes are available;
- Leak proof, withstand high centrifugal forces;
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional;
- Available with different packing types according to requirements.

Model No.	Description	Cap Type	Material	Packing
TYA101	Centrifuge Tube 50ml, free standing bottom, Printing graduation	Screw Cap	PP	50pcs/bag, 500pcs/ctn
TYA101-S	Centrifuge Tube 50ml, Free Standing, Individual Packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 50pcs/bag, 500pcs/ctn
TYA102	Centrifuge Tube 50ml, Conical Bottom, Printing graduation	Screw Cap	PP	50pcs/bag, 500pcs/ctn

TYA105-2	Centrifuge Tube 15ml, Conical Bottom, Foam Rack, Printing graduation	Screw Cap	PP	25pcs/rack, 500pcs/ctn
TYA106	Centrifuge Tube 15ml, Round Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 2000pcs/ctn
TYA107	Centrifuge Tube 15ml, Flat Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 2000pcs/ctn
TYA108	Centrifuge Tube 10ml, Conical Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 1000pcs/ctn
TYA108-S	Centrifuge Tube 10ml, Conical Bottom, Individual packing, E.O. Sterile, Printing graduation	Screw Cap	PP	1pc/bag, 100pcs/bag, 1000pcs/ctn
TYA109	Centrifuge Tube 10ml, Round Bottom, Printing graduation	Screw Cap	PP	100pcs/bag, 1000pcs/ctn

Product Usage

Microcentrifuge tube is a small centrifuge tube, which is used in conjunction with a micro centrifuge for the separation and centrifugation of trace reagents, and is widely used in the field of life sciences and clinical trials.

Features

- Full range volumes from 0.1ml to 10ml, apply to different solutions;
- Different bottom shapes and cap types for various testing purpose;
- Various Colors can be customized for distinguishing different samples;
- Made of high quality polypropylene raw material, enables excellent view of tube contents;
- Clear mold graduation and big writing area makes easy reading and recording (for 0.5ml-10ml);
- Tight and leak-free seal can open easily, even with gloves;
- Withstand high centrifugal forces;
- Bulk pack, RNase DNase DNA Free, EO sterilization are optional.

TYC101-TYC110-1

TYC111-TYC119

Product Usage

Pipette Tips are disposable accessory for the uptake and dispensing of liquids by using a pipette. They are mainly used in any molecular biology or genetic research application in laboratory.

Features (Economic Type)

- Made of medical grade polypropylene material. Suitable for molecular biology experiments.
- Full range of volumes from 10ul to 10ml, apply to different solutions.
- With good transparency, easy to observe the liquid level when using.
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf etc.
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional.
- Available with different packing types according to requirements, like bag packing, rack packing, stack packing.

Product Usage

Filter Pipette tips are single-use laboratory consumables made from polypropylene and are also with an aerosol barrier filter made of polyethylene. It provides an effective protective structure between the pipette and the sample to eliminate the risk of cross-contamination between the specimen and the micropipette. The filter pipette tips are mainly used in laboratory, hospital, and other research center.

Type-1 (Economic Type)

TYC201-TYC220

Features

- Made of high quality medical grade polypropylene, Suitable for molecular biology experiments;
- Full range of volumes from 10ul to 10ml, apply to different solutions;
- Mold Graduated easy for identification;
- Available with Transparent /Yellow/Blue color, with good transparency;
- Autoclavable, withstand 121°C;
- Non Sterile, RNase DNase DNA Free, EO sterilization are optional;
- Universal design, compatible with most famous pipettes like Gilson, Eppendorf, Biohit etc;
- Available with different packing types according to requirements, like bag packing, rack packing.

Pasteur Pipette

TYC06-TYC615

Individual Packing

Product Usage

Pasteur pipette also named transfer pipette, which is used for the absorption, transfer of small or trace amount of liquid. Dual bulb Pasteur pipette is designed to dispense precise volumes of liquids in a simple manner. They are widely used in testing, reagent addition applications and clinical laboratories.

Features

- Made of high quality LDPE material;
- Available volume: 60ul, 100ul, 120ul, 0.2ml, 0.5ml, 1ml, 2ml, 3ml, 5ml, 10ml;
- Optimizing process on surface tension, easy for the liquid flowing;
- High transparency, easy to observe;
- High elasticity, adapted to fast liquid transfer without leakage;
- Convenient and accurate for use with good repeatability;
- Available in E.O. or without sterilization;
- Pasteur pipette can be bent within a certain range, and can enter the micro or special-shaped container for liquid extraction and liquid addition operations.

Serological pipette

TYC701-TYC706

Stretched Tip & Welded Tip

With Filters and color codings

Individual Blister Packing

Product Usage

Serological pipette mainly used for accurate measure or transfer for certain volume liquid and is widely employed in the field of cell culture, bacteriology, clinical research, etc.

Features

- Made of high-grade polystyrene (GPPS);
- Graduations are calibrated within $\pm 2\%$;
- Smooth and clean without drawing lines;
- Different colors correspond to different specification, easy to distinguish;
- Clear and simple graduation, makes the liquid drawing and reading easier;
- All serological pipettes are assembled with high quality filters;
- Free of DNAses, RNAses, DNA and PCR inhibitors, non-pyrogenic.

Pipette

Single Channel Pipette

TYC801-TYC911

Product Usage

Pipettes are devices for transporting traces of liquid, especially measured amount, which is commonly used in the areas of chemistry, biology, and medicine.

With various designs in terms of levels of precision, pipettes serve for different purposes. Our pipettes features as accuracy, user-friendly simple calibration and fast transporting.

The ergonomically designed pipette is light in weight, its digital volume display and integrated ejector contribute to the quick and easy replacement of tips. Due to its compatibility with widely used standard pipette tips, it is often the favorite choice of labs.

Features

- The wide range of Volume: 0.1ul to 10 ml;
- Precise setting: volume can be perfectly identified due to digital display;
- High comfort: the low force required when comparing the same range of pipettes to complete the draining force (must press the bottom), The less force means the lower the risk of finger damage caused by long-term use;
- Easy and quick calibration and repair: with accessory tools;
- Tip ejector: perfectly designed for narrow tubes;
- Tip cone is autoclavable.
- Packing: 1pc/box, 50pcs/carton;

TYD101-115

TYD116

TYD201-203

Product Usage

Test tube is made of superior PP/PS material, it has a good chemical compatibility. Adapted to storage for most of polar organic solvent, weak acid, weak base. Multiple sizes and types can meet various test requirements.

Features

- Plastic test tube bottom: Round/Conical bottom;
- Test Tube Material: polystyrene or polypropylene;
- Volume: 5ml, 6ml, 7ml, 8ml, 9ml, 10ml, 11ml, 15ml, 16ml;
- Matching caps available, can be opened single-handed;
- Caps are available in different colors.

TYD203	Tube Stopper 16mm	PE	1000pcs/bag, 10000pcs/ctn

Features

- The bottle body can be made of high-quality PET/ PETG material, and the bottle cap is made of HDPE material;
- The capacity scale is clear to ensure accuracy and the surface is smooth and easy to clean;
- The chamfer design of the bottle mouth and cap has been strictly tested to ensure no leakage; the design of the body is easy to hold, easy to store and transport;
- PET operating temperature: -70°C-120°C; PETG operating temperature: -60°C-75°C;
- Compared with PET, the transparency of PETG is higher and the light transmittance is up to 90%;
- PETG is better than PET in terms of chemical resistance, oil resistance, weather resistance (yellowing) properties, mechanical strength, and barrier properties to oxygen and water vapor;
- DNase/RNase free, no pyrogen, no endotoxin. Irradiation sterilization.

Inoculation Loop

TYE601/TYE602/TYE607

TYE603-TYE606/TYE608/TYE609

Product Usage

Inoculation loops are widely used in microbiology and biotechnology to transfer and inoculate small amounts of microorganisms, such as bacteria or yeasts, from one substrate to another.

Features

- Made of high quality PP,ABS material;
- A variety of colors are used to distinguish different specifications;
- No flash, no burrs, will not puncture the agar surface;
- Easy to tear paper-plastic individual or bulk packaging.

L-shape cell spreader

Product Usage

It is mainly used in the flat coating of microbial culture medium, which can make cells or bacteria evenly distribute and grow on the surface of culture dishes and culture plates.

TYE701-TYE706

Features

- The surface is smooth, and the tail is designed upward to reduce damage to the agar surface;
- L-shaped design for easy use;
- Cell spreader is made of high quality PS or PP material;
- No flash, no burrs, will not puncture the agar surface;
- EO sterile or DNase/RNase free, no pyrogen, no endotoxin;

Model No.	Description	Material	Sterilization	Packing

Product Usage

PCR tube is a consumable for molecular biology PCR experiments. It is widely used in genetics, biochemistry, immunity, medicine and other fields. It is not only used in basic research such as gene isolation, cloning and nucleic acid sequence analysis, but can also be used in the diagnosis of diseases or in places with DNA and RNA. It is mainly in conjunction with PCR/qPCR/real-time PCR and other experiments.

Features

- Made of medical grade clear polypropylene(PP);
- Tube & cover have good sealing performance, prevent pollution and easy to open;
- The smooth and thin tube wall ensures the efficiency and uniformity of heat conduction;
- Transparent or White color;
- DNase/RNase Free, Non-Pyrogenic.

TYH104-TYH109

Product Usage

Embedding cassettes are generally made of plastic and are used for tissue embedding before paraffin sectioning in hospitals or laboratory pathological examinations.

Features

- Flow-thru slots in tissue cassettes
- Biopsy cassettes feature small pore openings
- 45° angle cassette for surface marking
- Three shapes available: stripe hole, square hole, round hole
- Different colors available: white, pink, blue, orange and yellow, etc.

Microscope Slides Storage Boxes included Microscope slide Mailer, slide tray, slide box, staining rack and jar and dry stand. They also made by different materials, like cardboard, Polypropylene, ABS and Glass. They are suitable for placing different size slides.

Features

- Can offer different types, from 1 place to 100 place;
- The flat surface area is good for labeling or writing;
- They are reusable to decrease the cost;
- Suitable for 25x75mm or 25x76mm slide, safe and secure transport of microscope slide.

Remark: Paper pad, cork pad and metal buckle are available upon client's request.

Introduction

Blood collection tubes are used for collection and packaging of blood samples for biochemical and immunological examinations in medical tests, and are used in clinical medical experiments using human venous blood as samples. According to the different objects of blood samples, blood collection tubes are divided into serum blood collection tubes, plasma blood collection tubes and whole blood collection tubes.

Features

- The tube body is made of PET material or glass material, with stable properties;
- The head cap is safe, with good air tightness, small puncture force, and convenient opening and capping;
- The inner wall is extremely smooth and be evenly coated by additive, to ensure the blood samples fully contact after entering the tube;
- Good compatibility, can match the transmission device of various biochemical, immune, blood and other analyzers;
- Labels can be customized according to customer needs.

Category	Test Item	Additive	Item	Cap Color	Specification
Serum blood collection tube	Clinical Biochemistry, Immunology and Serology Test	No additive	Plain Tube	Red	13x75mm: 2ml, 3ml, 4ml, 5ml 13x100mm: 5ml, 6ml, 7ml
		Clot Activator	Clot Activator Tube	Red Orange	16x100mm: 7ml, 8ml, 9ml, 10ml

Serum Blood Collection Tube

Serum blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. After centrifugation, serum can be effectively separated from blood cells and fibrin. Serum tube includes 3 tubes: Plain tube with red cap, Clot Activator tube with red/orange cap, and Gel & Clot Activator tube with yellow cap.

Plain Tube, Red Cap

Plain tubes also called No Additive tube, which is used for collection and packaging of blood samples such as medical testing, biochemistry, immunology, serology, various virus detection, blood bank inspection, etc. Plain tube can maintain the normal composition of serum for a long time and facilitate the re-examination of serum with good repeatability.

TYK101-203

Model No.	Material	Additive	Size(mm)	Vol	Packing
TYK101	PET	No additive	13x75	2ml, 3ml, 4ml, 5ml	100pcs/rack, 1800pcs/ctn
TYK201	Glass				
TYK102	PET				
TYK202	Glass	13x100	5ml, 6ml, 7ml	100pcs/rack, 1800pcs/ctn	
TYK103	PET				
TYK203	Glass	16x100	7ml, 8ml, 9ml, 10ml	100pcs/rack, 1200pcs/ctn	

Clot Activator Tube, Red/Orange Cap

Clot Activator tube, also known as pro-coagulant tube, is used to collect serum samples for biochemical and immunological testing, and can be used for rapid outpatient, emergency serum biochemical tests. The inner wall is extremely smooth and be evenly coated by coagulant. It has a wide operating temperature range. Blood clots completely within minutes, and centrifugation yields high quality serum.

TYK104-206

Model No.	Material	Additive	Size(mm)	Vol	Packing
TYK104	PET	Clot Activator	13x75	2ml, 3ml, 4ml, 5ml	100pcs/rack, 1800pcs/ctn
TYK204	Glass				
TYK105	PET				
TYK205	Glass	13x100	5ml, 6ml, 7ml	100pcs/rack, 1800pcs/ctn	
TYK106	PET				
TYK206	Glass	16x100	7ml, 8ml, 9ml, 10ml	100pcs/rack, 1200pcs/ctn	

Gel and Clot Activator Tube, Yellow Cap

Gel & Clot Activator tubes are used for serum biochemistry, drug detection and immunology etc. Coagulant is finely coated on the inner wall of which can shorten the blood coagulation time. After centrifugation, the serum and blood cells are completely separated to obtain high quality serum.

Whole Blood Collection Tube

Whole blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. Whole blood collection tube includes 2 kinds of tubes: EDTA tube with purple cap and ESR tube with black cap.

TYK110-212

TYK113-213-3

TYK213-1-213-2

EDTA Tube, Purple Cap

EDTA tubes are used for clinical hematology examinations, blood typing and cross-blood mixing and so on. It can comprehensively protect blood cells, effectively prevent platelet aggregation, and protect blood cells in shape and volume for a long time. EDTA anti coagulated plasma is used for molecular biological identification of parasites, bacteria and pathogenic microorganisms.

Model No.	Material	Additive	Size(mm)	Vol	Packing

ESR Tube, 3.8% Sodium Citrate, Black Cap

ESR tubes are mainly used for blood sample collection and anti-coagulation during erythrocyte sedimentation rate test. It contains 3.8%(0.129mol/L) sodium citrate buffer which mixed with blood in a ratio of 4:1. It is suitable for ESR testing for different genders and ages. 8x120 ESR tube is applicable to various automated erythrocyte sedimentation rate analyzers. Because of little volume and negative pressure inside the tube, it needs some time for blood collection. Wait for the blood to stop flowing into the blood collection tube and mix it 6-8 times to fully mix the anticoagulant and blood. 13x75 ESR tube is specially used in blood collection and anti coagulation for automated erythrocyte sedimentation rate analyzers sedimentation rate test with the mixing ratio of 1 part sodium citrate to 4 parts blood, by Westergren method.

Model No.	Material	Additive	Size(mm)	Vol	Packing

Plasma Blood Collection Tube

Plasma blood collection tubes are designed to provide uncontaminated, undifferentiated raw blood samples for medical testing. Plasma can be effectively separated from blood cells after centrifugation. Plasma tube includes 5 kinds of tubes: PT tube with blue cap, Heparin tube and Gel&Heparin tube with green Cap, Glucose tube with gray cap, Compound of Sodium Fluoride and Anticoagulant tube with gray cap.

TYK114-116-1

TYK117-219

TYK120-222

TYK123-225

PT Tube , 3.2% Sodium Citrate, Blue Cap

PT tube is used to obtain plasma samples for the coagulation test. It contains 3.2%(0.109mo/L) buffered sodium citrate solution. Blood and sodium citrate are mixed in a ratio of 9:1, and the ratio is accurate to ensure the validity of the test results. Due to the low toxicity of sodium citrate, it is also used for blood preservation.

Model No.	Material	Additive	Size(mm)	Vol	Packing

Heparin Tube, Green Cap

Heparin tube is used for the collection of blood samples for clinical plasma biochemical and blood rheology determination, without affecting the volume of red blood cells and causing hemolysis. Inside the tube wall, where is well sprayed with lithium heparin or sodium heparin which is a kind of anticoagulant activating antithrombin to block the coagulation cascade reaction. The operating temperature range is wide, the plasma separation speed is fast, and the compatibility with serum specimen indicators is strong. In addition to the characteristics of heparin sodium, lithium heparin can also be used for the detection of trace elements. Plasma separation gel can be added according to customer requirements to prepare high quality plasma to meet the needs of clinical experiments.

Model No.	Material	Additive	Size(mm)	Vol	Packing

Gel and Heparin Tube, Green Cap

Gel and Heparin tubes are anticoagulant tubes used to obtain high quality plasma samples for rapid emergency biochemical testing. It contains Heparin Sodium or Heparin Lithium and Gel at the bottom of the tube, which is used to separate plasma and blood cells. The exchange of substances can be prevented, so that the obtained plasma is free from blood cell contamination, making the results accurate. In this way, samples can be placed directly into the equipment to meet the quality requirements for re-inspection.

Transport Swab With Gel

TYO101

TYO102

TYO103

TYO104

Product Usage

Transport swabs for specimen transport is composed of collection swab, tip and PP sealing tube, mainly used for sampling, storage, transportation of microbe specimen.

Features

- Swab stick optional in material: wood, PS, PS, ABS, Stainless steel;
- Swab tips optional in material: cotton, polyester fiber (Viscose), Rayon, Dacron, Nylon;
- Size :12x170mm;
- Dry Swab, with medium, with sealed tube, add Charcoal is available;
- Purpose: avoid pollution of the microbe before test.

Flocked Swab

TYO201

TYO202

TYO203

TYO204

TYO205

TYO206

Product Usage

Flocked swabs are specimen collection devices that are ideal for use in rapid diagnostic testing. They are capable of efficiently collecting organisms and cells at the collection site and have the ability to rapidly release cells. These single-use tools feature perpendicular nylon fibers that are affixed to the surface of a swab, optimizing specimen collection.

Features

- The stick material is available in virgin PP, PS or ABS;
- Breaking point design to facilitate sample handling, storage and transportation;
- The swab tip material is available in superior flocked nylon and rayon;
- Flocked tip maximize the sampling efficiency;
- Gamma-irradiation/E.O. sterilization.

Product Usage

Sampling swabs are used to store microbiological samples and transport them to clinical laboratories.

Features

- Composed by stick, tip and sealing tube;
- The stick material is available in stainless steel, wood, PP, PS or ABS;
- The swab tip material is available in superior absorbent cotton, artificial cotton, polyester fiber;
- The sealing tube material is available in virgin PP/PS;
- Special treatment on the stick makes the tip wrapped on the stick tightly;
- Complete sampling kits for the safe collection, transport and preservation;
- Adapted to sampling from the parts of urethra and so on;
- Used for sampling from the parts of vagina, urogenital canal, etc.

Plain Tube
普通管

Usage: Applying to blood specimen collection and storage for biochemical, immunological and serum clinical examination. Whether it is glass or plastic tube, the wall is extremely smooth, and can effectively prevent blood cells attaching to the wall, which can minimize the specimens in vitro hemolysis.

用途：用于生化、免疫、血清等临床医学检验中血液样本的采集和贮藏。无论是玻璃管还是塑料管，其内壁都极其光滑，能有效避免血细胞附壁，最大限度减少标本体外溶血。

Gel and Clot Activator Tube
分离胶管

Usage: Applying to the acquisition of high-quality serum, specimen for biochemical, immunological and serum clinical examination. Serum separation gel is a kind of semi-solid inert gel, composed of several compounds and synthesized by medical polymeric material. After blood centrifugal, the specimen can be separated into serum top, separation gel middle and blood corpuscle lower. In the middle of the tube, a thick layer of separation gel can completely isolate serum from blood corpuscle, so as to ensure the purity of serum.

用途：用于生化、免疫、血清等临床医学检验中获得高品质血清样本。血清分离胶是一种由数种化合物所组成之半固体惰性胶，该分离胶全部采用医用高分子材料合成，采用离心后，将分离成血清（上层）、血清分离胶（中层）及血球（下层）。试管中间厚厚一层血清分离胶能完全隔离血清及血球，让血球无法接触到血清，从而保证了血清的纯净度。

Pro-Coagulation Tube
促凝管

Usage: Applying to fast collection of blood specimen for biochemical and immunological clinical examination. A kind of coagulant, which is different from other chemical coagulants having effects on the test results, was sprayed evenly on the inner wall of the tube to speed the blood solidification without any heating devices (such as water container). After blood collection, let the tube stand for 15 minutes (make sure the ambient temperature over 16°C), and then you can get the ideal and high purity serum.

用途：用于生化、免疫等临床医学检验中要求快速血液样本的采集。该储血管内添加的促凝剂，有别于其他化学促凝法对检测结果的影响。促凝剂均匀喷涂在储血管内壁上，无需借助于任何加热设施（如水温箱等），完全采用纯物理化，致使血液快速凝固。采血完毕后，静置立放15分钟（离心环境温度保证在16°C），即可得到理想、高纯净度的血清。

ESR Vacuum Tube
血沉管

Usage: 1.28ml tube with a total capacity of 1.6ml, is equipped with 0.129mol/L sodium citrate 0.32ml. Collect blood 1.28ml to the central scale and after blood collection, we immediately invert the tube gently for 4-5 times so as to mix blood completely with anticoagulant, then put the tube into a D2010 automatic ESR analyzer and after 30 minutes read the data. This product can save time and effort and at the same time prevent cross infection.

用途：1.28ml管装有0.129mol/L柠檬酸钠0.32ml，采血1.28ml，至中央刻度处，总容量为1.6ml。采血后，立即轻轻反复颠倒4-5次，使抗凝剂充分与血液混匀。然后放入D2010型自动血沉分析仪内，30分钟后即可读数。该产品省时、省力，从源头杜绝了交叉感染。
