To Whom It May Concern:

This letter serves as a formal recommendation for Esempla Systems, based on their exemplary performance in the development of the Informational System on Population and Migration Statistics (ISPMS) for the National Bureau of Statistics of Moldova, under Contract No. UNFPA/MDA/PSC/21/008, executed from October 2021 to July 2022.

Esempla Systems demonstrated exceptional technical proficiency in implementing a complex system that integrates multiple state information resources and administrative data sources. Their solution effectively manages multi-register statistical databases, automates data collection and processing, and supports both traditional and register-based census methods.

The project's success is largely attributed to Esempla's skill in orchestrating a sophisticated technical environment, incorporating MGov cloud (Mcloud) and IaaS / PaaS services, including MConnect, MPass, MSign, MNotify, MLog, MCabinet, MPay, MPower, POGD and a sophisticated technology stack involving Java 15, Spring Framework, Angular, and Docker, among others.. They also achieved seamless interoperability with multiple government agencies' IT systems, including those of the Public Services Agency, Ministry of Internal Affairs, and Ministry of Health, Labor and Social Protection. This orchestration fostered an ecosystem where data collection, processing, and validation were significantly automated, reducing costs and mitigating respondent burden effectively.

Esempla's project management approach, combining Scrum and Waterfall methodologies, ensured timely delivery and continuous improvement. The team, led by Tatiana Berlinschi and including Daniela Motpan, Sergiu Garaba, Vitalie Lazari, Victor Tudor, Dumitru Virtosu, Mihai Gaidau, Stanislav Doruc, and Nicoleta Ionas, demonstrated exceptional skills in business analysis, software development, system integration, and data migration.

Esempla Systems consistently surpassed expectations, delivering innovative solutions and added value throughout the project. Their commitment to excellence and ability to meet contractual obligations make them a highly recommended partner for any organization seeking top-tier software development services.

Sincerely,

Aurelia Spataru
Deputy General Manager
National Bureau of Statistics, Moldova
