INTEGRAL

THE TONER FOR BETTER IMAGES

QUALITY WARRANTY

INTEGRAL certifies that all products offered and supplied under the INTEGRAL and **GTI** brand have been developed for optimized copy and print performance. All INTEGRAL toners are manufactured exclusively from high quality specialty raw materials instead of cheaper basic raw materials often used for the production of conventional toners.

Throughout the manufacturing process INTEGRAL toners are subject to strict procedures. Fully automated and computer controlled toner manufacturing facilities guarantee consistent quality.

A comprehensive quality control system built into every step of production ensures that only such product is delivered, which lives up to INTEGRAL's commitment to quality. State of the art laboratory facilities support the rigorous quality control system. Before being released to the market all INTEGRAL toners undergo strict quality control procedures in terms of parameter analysis and extensive copy and print testing.

INTEGRAL warrants that INTEGRAL toner is free from defects in materials and workmanship for a period of (2) years from date of purchase. INTEGRAL toner will not cause harm to the machines in which they are installed when used in a printer or multifunctional machine for which it is intended, when the toner is stored, installed, maintained and used properly, and when the machine is properly used and maintained in accordance with the manufacturer's recommendations and user manuals.

Additionally all toners for use in Kyocera Mita equipment are certified by the "Pollutant tested" official seal, which attest the innocuousness of the INTEGRAL toner.

INTEGRAL GmbH
47647 Kerken / Germany

A handwritten signature in black ink, appearing to be 'U. J. ...', is written over the printed contact information.

Kerken, January 2016

The European Chemical Law REACH entered into force in 2007 and from then onwards, all substances entering into the European Union must be registered. Due to being a preparation of substances, toner cannot be registered by itself, however, all substances contained in it must be registered (each toner comprises between 6-10 different substances). The import or selling of products made of unregistered substances is punishable by law.

By using INTEGRAL toners, you will not only get optimal quality and performance, but also a **fully REACH-compliant toner** that fulfils the highest European quality and health standards, being CO₂ neutral produced and based on tested, hazard-free substances.

Stay at ease with **INTEGRAL** toners
